

OMS Newsletter – October 2017

Our monthly newsletter keeps you up-to-date on all the new, existing, add-on functions which you can use to get the most out of your OMS software. This is the Power of OMS!

This month we would like to share:

Purchase Order in Foreign Currency

Do you make purchases with vendors dealing in foreign currencies? If you do, you may want to enter and print your purchase orders in a foreign currency. With the multiple foreign currency exchange rates setup, when creating a purchase order, you have the ability to specify the foreign currency as well as mutually agreed currency exchange rate to enter and print a purchase order in terms of the foreign currency. This purchase order can also be saved as your home currency (US Dollars) as well. Upon purchase order receiving in the foreign currency, you can enter the amount in the foreign currency with the mutually agreed exchange rate, which can also be saved as your home currency (US Dollars).

Alternative Items.

You can offer substitutes to your customers if certain items are out of stock or no longer available or pricing concerns. With the Alternative Items function in the Inventory File, you can build a great business relationship by providing and selling a variety of alternative items when the original items are temporarily not available or discontinued or higher prices. When you process sales orders and invoices, the out-of-stock warning window can provide you the option to provide substitutes as specified to provide these alternative items to earn business as well as customer satisfaction.

Please NEVER hesitate to give us a call if you have any questions. Thank you for using OMS!
